

## AGRI PROTOCOL

# For Cassava

### **APSA 80**

- For land preparation, dilute 8 tablespoons (80 milliliters) in 16 liters of water or 800 milliliters to 1 liter of APSA 80 in 1 drum of water and spray the solution to the soil 2 to 3 days before planting.
- Spray 10 to 12 spray loads of APSA 80 per hectare as soil conditioner.

### **Nutriplant SL**

- For preparation of solution for soaking, dilute Nutriplant SL in water at 250 milliliters per 125 liters of water. Use 500 milliliters of Nutriplant SL per hectare of cassava stalks. Soak cassava stalks 30 minutes before planting or spray to furrow with stalks before covering the soil.
- Spraying of SL solution to stalks in dripping wet prior to planting can also be done (1 hectare = average 10 to 12 knapsack).

# For Cassava

## **Nutriplant AG**

- Dilute 100 milliliters (10 tablespoons) of Nutriplant AG and 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water or 1 liter of Nutriplant AG and 65 milliliters (6.5 tablespoons) of APSA 80 per drum (200 liters) of water. Always shake the bottle of Nutriplant AG before mixing it with water.
- Spray Nutriplant AG solution 20 to 30 days after planting (DAP).

## **Nutriplant NPK**

- Dilute 100 milliliters (10 tablespoons) of Nutriplant NPK and 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water or 1 liter of Nutriplant NPK and 65 milliliters (6.5 tablespoons) of APSA 80 per drum (200 liters) of water. Always shake the bottle of Nutriplant NPK before mixing it with water.
- Nutriplant NPK solution will be spray 50 to 60 days after Planting.

## **Nutriplant K**

- Dilute 100 milliliters (10 tablespoons) of Nutriplant K and 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water or 1 liter Nutriplant K and 65 milliliters (6.5 tablespoons) of APSA 80 per drum (200 liters) of water. Always shake the bottle of Nutriplant K before mixing it with water. Nutriplant K will be sprayed 90 days after planting.
