

## AGRI PROTOCOL

# For Moringa

### APSA 80

- For land preparation, dilute 8 tablespoons (80 milliliters) in 16 liters of water or 800 milliliters to 1 liter of APSA 80 in 1 drum of water and spray the solution to the soil 2 to 3 days before planting.
- APSA 80 can be mixed with all kinds of chemicals. Dilute 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water and mix with appropriate amount of pesticide and foliar fertilizer.

### Nutriplant SD (Seed Propagation)

- 45 to 65 grams of Nutriplant SD can be mixed in 1 kilogram of seeds.
- Keep the seeds dry during mixing.

### Nutriplant SL (Stem Propagation)

- Prepare solution for soaking/spraying/drenching (cuttings).
- Dilute Nutriplant SL in water at 32-40 milliliters of Nutriplant SL per 16 liters of water.

# For Moringa

## Nutriplant AG

- Dilute 100 milliliters (10 tablespoons) of Nutriplant AG and 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water. Always shake the bottle of Nutriplant AG before mixing it with water.
- For seed propagation, spray Nutriplant AG 15 days after planting and repeat spraying once a week until harvest.
- For stem propagation, Spray Nutriplant AG every 15 days interval until harvest.
- Nutriplant AG can also be mixed with pesticides to minimize spraying labor cost. For best results, apply Nutriplant AG solution late in the afternoon or early in the morning.
