

AGRI PROTOCOL

# For Sorghum

## **APSA 80**

- For land preparation, dilute 8 tablespoons (80 milliliters) in 16 liters of water. Spray the solution to the soil 2 to 3 days before planting.
- Spray 10-12 spray loads of APSA 80 per hectare as soil conditioner.
- APSA 80 can be mixed with all kinds of pesticide. Dilute 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water. Mix appropriate amount of pesticide.

## **Nutriplant SD**

- 135 grams of Nutriplant SD can be mixed with 6 - 7 kilos of Sorghum seeds.
- Keep seeds dry during mixing.

# For Sorghum

## **Nutriplant AG and ZN**

- Dilute 100 milliliters (10 tablespoons) of Nutriplant AG and 100 milliliters (10 tablespoons) of Nutriplant ZN and 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water. Always shake the bottle of Nutriplant AG before mixing it with water.
- Spray the Nutriplant AG and Nutriplant ZN solution 15 - 20 days after germination.
- Nutriplant AG can also be mixed with pesticides to minimize spraying labor cost. For best results, apply Nutriplant AG solution late in the afternoon or early in the morning.

## **Nutriplant NPK**

- Dilute 100 milliliters (10 tablespoons) of Nutriplant NPK and 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water or 1 liter of Nutriplant NPK and 65 milliliters (6.5 tablespoon) of APSA 80 per drum (200 liters) of water. Always shake the bottle of Nutriplant NPK before mixing it with water. Nutriplant NPK can be applied during 35 - 40 days after sowing.

## **Nutriplant K**

- Dilute 100 milliliters (10 tablespoons) of Nutriplant K and 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water or 1 liter of Nutriplant K and 65 milliliters (6.5 tablespoon) of APSA 80 per drum (200 liters) of water. Always shake the bottle of Nutriplant K before mixing it with water. Nutriplant K can be applied during 50 - 55 days after sowing.
