

AGRI PROTOCOL

For Hydroponics

Nutriplant SL for Hydroponics Nutrient Solution

- Dilute 2 milliliters of Nutriplant SL per 1 liter of water.

Nutriplant AG for Foliar Fertilization

- Dilute 5 milliliters of Nutriplant AG plus 0.31 milliliter of APSA 80 in 1 liter of water or 100 milliliters (10 tablespoons) of Nutriplant AG plus 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water. Always shake the bottle of Nutriplant AG before mixing it with water.
- Spray Nutriplant AG solution 7 to 10 days after planting.
- Repeat application when plants has 6 leaves.
- Nutriplant AG can also be mixed with pesticides to minimize spraying labor cost. For best results, apply Nutriplant AG solution late in the afternoon or early in the morning.
