

## AGRI PROTOCOL

# For Palm Oil

### APSA 80

- For land preparation, dilute 8 tablespoons (80 milliliters) in 16 liters of water or 800 milliliters to 1 liter of APSA 80 in 1 drum of water and spray the solution to the soil 2 to 3 days before planting.
- Spray 10 to 12 spray loads of APSA 80 per hectare as soil conditioner.

### Nutriplant SL

- For preparation of solution for drenching, dilute Nutriplant SL in water at 250 milliliters per 125 liters of water. Drench 0.5 to 1.0 liter of Nutriplant SL solution per hill immediately after transplanting.

# For Palm Oil

## Nutriplant AG

- Dilute 100 milliliters (10 tablespoons) of Nutriplant AG plus 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water or 1 liter of Nutriplant AG plus 65 milliliters (6.5 tablespoons) of APSA 80 per drum (200 liters) of water. Always shake the bottle of Nutriplant AG before mixing it with water.
- Begin spray Nutriplant AG solution 30 days after transplanting.
- Repeat spraying in quarterly basis.

## Nutriplant NPK

- Dilute 100 milliliters (10 tablespoons) of Nutriplant NPK plus 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water or 1 liter of Nutriplant NPK plus 65 milliliters (6.5 tablespoons) of APSA 80 per drum (200 liters) of water. Always shake the bottle of Nutriplant NPK before mixing it with water.
- Nutriplant NPK solution will be spray during flowering.

## Nutriplant K

- Dilute 100 milliliters (10 tablespoons) of Nutriplant K plus 5 milliliters (1 teaspoon) of APSA 80 in 16 liters of water or 1 liter of Nutriplant K plus 65 milliliters (6.5 tablespoons) of APSA 80 per drum (200 liters) of water. Always shake the bottle of Nutriplant K before mixing it with water. Nutriplant K will be sprayed fruit set.

**Note:** Continue spraying Nutriplant AG solution after first harvest in a quarterly basis may obtain best result.
